

4 Courses

**Spring - Ecosystem and Core**  
**Spring MVC, Spring Boot and Rest Controllers**  
**Spring Data Repositories**  
**Spring - Cloud Overview**

Mar 19, 2025

## Shanmukha Potturi

has successfully completed the online, non-credit Specialization

# Spring Framework

This course series explains high level patterns used in Microservice architectures and the motivation to move towards these architectures and away from monolithic development of applications. Students will also learn how Java interacts with databases in a modern framework, using the very popular Spring Boot Framework, with Microservices. Students wishing to develop Java based Web Applications and Restful Micro Services will be using the very popular Spring MVC and Spring Boot frameworks with minimal configuration.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
